

FullOceans changes the deal in Navigation Aid Buoys market.

FullOceans brings an innovative approach in the Navigation Aid Equipment market integrating internet companies' business model.

Clear and low prices, transparency in quotations for quality products, FullOceans proposes a complete range of Polyethylene Marine Buoys with their optional equipment available in an online shop.

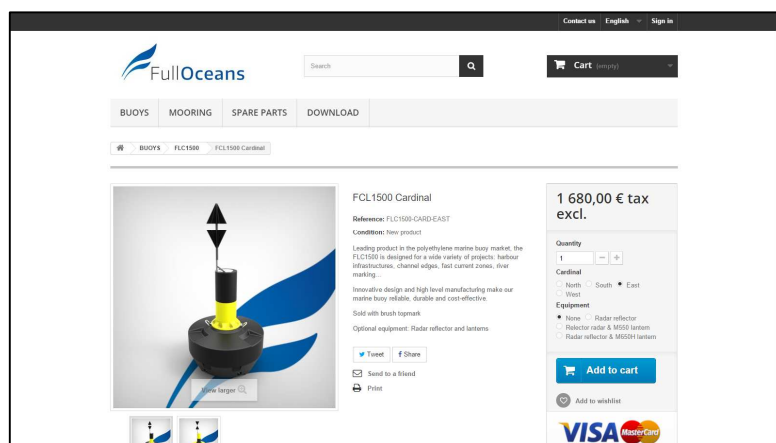

Delays for quotes, prices according to incomes, all this is over with the transparency of FullOceans online service! FullOceans makes it clear and simple.

For the first time, all professionals can now connect to www.fulloceans.com, choose their products, compare prices and characteristics, and create their own quotes or directly purchase online their Navigation Aid Buoy.

A simple 4 steps process:

1. Select your buoys size: FLC1200, FLC1500, FLC1800 or FLC2200
2. Choose your optional equipment (topmarks, lanterns, mooring solutions ...)
3. Get an immediate quote
4. Buy it online
and value your money!

With FullOceans you can quote your project in few minutes, purchase immediately or wait the adequate moment, and receive the most cost effective buoys of the market in few weeks all over the world.

FullOceans in few words

FullOceans is a new company providing navigation aid equipment for a worldwide market and is specialized in navigation aid buoys.

FullOceans integrates the latest R&D innovations and manufacturing technologies in order to produce quality and safety, as well as value-for-money products.

Our commitment is to invest in the best engineering and manufacturing solutions to reduce the costs of our buoys without forgetting the quality demands of the floating navigation aid market.

Durable and reliable, our buoy's range is the perfect solution to meet the needs of maritime, coastal, offshore and river projects.

Safety, performance, and costs have been given top priority in the design of our products making them easy to maintain and operate. Our policy is made possible thanks to several factors:

- Optimized design
- Search of the best partners and suppliers
- Minimum margins for all our buoys
- Optimized manufacturing methods and costs
- Direct on-line business model
